## 🌿 DRAINAGE FITTING

**OPTION DESCRIPTION:** Ore Drainage Fittings consist of one-inch pipe nipples or elbows that are welded into each container in order to direct water away from the deck surface, eliminating tea staining and standing water. Our Project Managers are on hand to discuss ideal placement and quantity for your chosen containers.

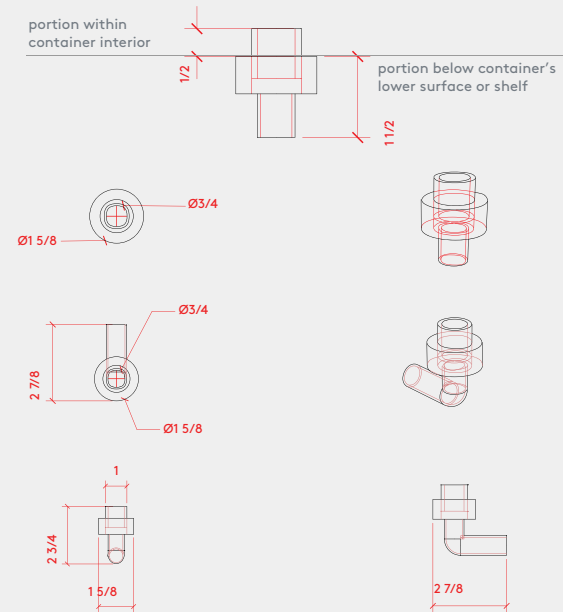

Please note that this type of installation is compatible with other functional options such as irrigation sleeves, casters, and adjustable feet. To determine which containers are compatible with the Drainage Fitting option, look for this icon in our catalog and specification sheets.

Drainage Fitting on Column with Casters and Irrigation Sleeve

### ORE DRAINAGE FITTING DIMENSIONS:

Select drainage fittings to control and direct moisture away from surfaces below, as in balcony installations or when containers are placed over wood decking.
