■ DRIP TRAY

OPTION DESCRIPTION: Ore Drip Trays are sized to match each container's footprint. A 1/2" gap between the tray and the container creates a shadow reveal. Trays are made of recycled aluminum and powder coated to match. Our Project Managers are on hand to advise you on the best solutions to meet your project requirement.

Please note that this option is compatible with other functional options such as irrigation sleeves and drainage fittings. To determine which containers are compatible with the Drip Tray option, look for this icon in our catalog and specification sheets.

DRIP TRAY | Ore Drip Trays retain excess plant water to protect deck and patio surfaces from stains and mildew. Our trays are fabricated to blend seamlessly with our selection of unique container designs. In order to ensure a proper fit, containers and companion Drip Trays must be ordered at the same time.
