🔒 SURFACE MOUNTS

OPTION DESCRIPTION: Ore Surface Mounts are hardware pieces that blindly secure planters to a deck surface. Please visit our website or contact your Project Manager for more detailed information and recommendations for your project.

Please note that this option is compatible with other functional options such as irrigation sleeves and drainage fittings. To determine which containers are compatible with the Surface Mount option, look for this icon in our catalog and specification sheets.

HARDWARE | Internal bolting of mounting hardware allows for the securing of containers with only two screws on the exterior lower skid.

MOUNTING BRACKETS | Ore Mounting Brackets provide additional stability and security. Bolting the mounting hardware internally – on the inside of the bottom skid – allows containers to be secured with only two screws on the exterior lower skid.
